THE BEST TRAINING CENTER IN THE WORLD

8,500 SURGEONS TRAINED EACH YEAR (ONLINE & ON-SITE)

FULL IMMERSION IN COLORECTAL SURGERY

Technology has an increasingly significant impact on the future of surgery. Robotics, patient-specific 3D preoperative simulation, intraoperative augmented imaging, advanced flexible endoscopic operative platforms and tools, tailored multimodal treatments, and evidence-based medicine are now the foundation of modern, personalized surgery. In the colorectal field, no-scar surgery through natural orifices has created the perfect balance between safety, efficacy, and patient benefits, especially in rectal cancer treatment.

IRCAD's model of international education and hands-on training exemplifies the most innovative method of learning modern surgery in a safe, cost-effective, and enjoyable way.

Leading surgeons from around the world share their expertise through live surgery, educational videos, and lectures, both online and on-site and are happy to assist participants during hands-on training sessions on live tissue and anatomical specimens.

Thanks to our new state-of-the-art auditorium equipped with 3D 4K projectors, live robotic surgery can be experienced at its best.

Since 2022, IRCAD has been providing an exclusive week-long course that not only provides extensive and intensive training but can also grant a University Diploma and European credits for continuing medical education.
