FULL IMMERSION IN HEPATOBILIARY AND PANCREATIC SURGERY

Come and join us for our 3-day advanced course in hepatobiliary and pancreatic (HBP) surgery. This course is intended for HBP surgeons, general surgeons, fellows and residents in training.

The course is structured with mornings dedicated to didactic theoretical presentations by world-renowned experts, including video sessions, live surgeries and discussions. The objective is to create the greatest interaction between participants and experts.

The afternoons are dedicated to practical learning in the experimental lab, with the possibility of using a set of devices (CUSA, ultrasound, robotic initiation, ...).

Laparoscopic and robotic approaches including the latest technologies and innovations (3D reconstruction, fluorescence, image-guided surgery) will be discussed. All pathologies (biliary, hepatic, and pancreatic) will be tackled with a special focus on the prevention and management of complications.
