

IRCAD: INNOVATION & EXCELLENCE FOR SURGERY

The IRCAD offers an exceptional training facility, welcoming over 7,200 surgeons from all surgical specialties every year. It is considered one of the leading surgical education providers in the world in the field of minimally invasive surgery. With the world's top experts, the perfect mix between theoretical sessions and hands-on practice, and the latest generation of robots, the IRCAD experience will answer all your needs.

FULL IMMERSION IN GI ENDOSCOPY

Over the last years, therapeutic endoscopy has progressively become the first-line treatment for a variety of pathologies involving the upper and lower gastrointestinal tract. Superficial early gastrointestinal neoplasia and preneoplastic lesions may safely be removed with endoscopic mucosectomy (EMR), endoscopic submucosal dissection (ESD), and endoscopic full-thickness resection (EFTR): these organ-sparing procedures have completely changed the approach for a multitude of patients benefiting from early diagnosis thanks to major advances in endoscopic imaging.

Many benign esophageal diseases (e.g. Zenker's diverticulum, achalasia, symptomatic esophageal diverticula, gastroesophageal reflux) may also benefit from a minimally invasive endoscopic approach. The course will focus on the technical aspects, treatment of potential complications, results and novelties of these endoscopic treatments. The IRCAD course is a unique opportunity to learn about modern approaches to a wide range of clinical scenarios, and to train for the management of digestive diseases.
