THE BEST TRAINING CENTER IN THE WORLD

8,500 SURGEONS TRAINED EACH YEAR (ONLINE & ON-SITE)

FULL IMMERSION IN COLORECTAL SURGERY

Technology has an increasingly significant impact on the future of surgery. Robotics, patient-specific 3D preoperative simulation, intraoperative augmented imaging, advanced flexible endoscopic operative platforms and tools, tailored multimodal treatments, and evidence-based medicine are now the foundation of modern, personalized surgery. In the colorectal field, no-scar surgery through natural orifices has created the perfect balance between safety, efficacy, and patient benefits, especially in rectal cancer treatment.

IRCAD's model of international education and handson training exemplifies the most innovative method of learning modern surgery in a safe, cost-effective, and enjoyable way. Leading surgeons from around the world share their expertise through live surgery, educational videos, and lectures, both online and on-site and are happy to assist participants during hands-on training sessions on live tissue and anatomical specimens.

Thanks to our new state-of-the-art auditorium equipped with 3D 4K projectors, live robotic surgery can be experienced at its best.

Since 2022, IRCAD has been providing an exclusive week-long course that not only provides extensive and intensive training but can also grant a University Diploma and European credits for continuing medical education.
