COURSE OBJECTIVES

- To provide the basic skills required for good progress in clinical laparoscopic practice
- To describe technical steps used for advanced laparoscopic procedures
- To describe results and potential complications, and how to prevent them
- To practice on live tissue in order to give participants the technical tools to improve their practice

EDUCATIONAL METHODS

- Interactive theoretical and video sessions between Faculty and course participants
- Live or pre-recorded operative demonstrations
- Practical training on live tissue (mini-pigs)
