THE BEST TRAINING CENTER IN THE WORLD

IRCAD is one of the leading surgical education providers in the world, an ambassador of French excellence in minimally invasive surgery. The Institute offers unique training facilities, and welcomes over 8,800 surgeons from all surgical specialties every year. The remarkable involvement and self-commitment of more than 800 international experts, who are recognized as international opinion leaders, is key to the Institute's success.

FULL IMMERSION IN UROLOGIC SURGERY

Over these last few years, the minimally invasive approach has gradually superseded the conventional open approach in several urological surgery indications.
Thanks to the quality of operative vision provided by high-definition 2D or 3D cameras and to the precision of laparoscopic surgery maneuvers, this minimally invasive approach has allowed to improve the quality and accuracy of interventions and to ensure their safety, mainly for cancer treatment. Surgical progress in conventional laparoscopy have gradually taken off and led to enhanced precision surgery.

The development of robotic assistance has further increased the level of quality and precision of this surgery thanks to the 3D vision, the loss of any limit of mobility in the operative gesture and the quality of comfort for the operating surgeon.

All urological procedures using these laparoscopic or robot-assisted techniques make up IRCAD training programs in urological surgery.
Intensive courses will be split between theoretical sessions organized by world-renowned experts and hands-on sessions in the experimental lab with all these laparoscopic and robotic technologies supplied.
Considering the development of robotic surgery, the IRCAD urology incorporates a purely robotic course with theoretical sessions, live broadcasts and training workshops on anatomical specimens using surgical robotic systems.
In addition, urology courses are also organized in other areas of minimally invasive surgery (endo-urology) and new technologies of BPH surgery (laser and waterjet for instance).
