

Research Fellow: Advanced Technologies in Minimally Invasive Surgery

DESCRIPTION

Company: IRCAD was created in 1994 in Strasbourg by Professor Jacques Marescaux. It is an internationally renowned research and training center. The Institute welcomes every year more than 8,000 healthcare professionals to provide them with state-of-the-art training in minimally invasive surgery in various specialties with the latest technologies (image-guided surgery, artificial intelligence, robotics, etc.).

Contact info: communication@ircad.fr
