## COURSE OBJECTIVES

---

- To get familiar with the most advanced minimal invasive techniques for the treatment of the gastrointestinal tract, liver, pancreas, spleen diseases
- To get familiar with the application of new technologies to minimally invasive approaches and modern endoscopic and percutaneous interventional procedures
- To get familiar with new technologies for augmented imaging, robotics and artificial intelligence applied to general surgery
- To acquire advanced laparoscopic skills in the lab: suturing, stapling, handsewn anastomosis, bleed controls in emergency situations
- To interact with best international experts to learn state of the art about surgical techniques and new technologies
- To discuss interesting and challenging clinical cases

## COURSE ENDORSEMENT AND ACCREDITATION

---

This course is accredited by the European Accreditation Council for Continuing Medical Education (EACCME) to provide the following CME activity for medical specialists. The EACCME is an institution of the European Union of Medical Specialists (UEMS).
